

MEMORANDUM

To: Mayor and City Council

From: Mike Garza, P.E., Assistant Director of Public Works

Kent Collins, P.E., Director of Public Works

Date: July 9, 2019

Reference: Consider approval of an Interlocal Agreement between the City and Northwest

Dallas County Flood Control District to satisfy the requirements of TCEQ Phase

II Storm Water discharge compliance; and authorizing the Mayor to sign.

2030: Sustainable City Government, Goal 3

Excellent and Well-maintained City Infrastructure and Facilities

General:

- This is a 5-year agreement.
- The original agreement was executed in 2008 and renewed in 2014.
- This is a combined storm water management plan with the flood control district.
- This is part of an unfunded mandate by TCEQ.

Introduction:

This agenda item corresponds to the approval of the Storm Water Management Program (SWMP) also before you this evening. The original Interlocal agreement with the Northwest Dallas County Flood Control District (NWDCFCD) for the combined storm water management plan was approved by council in 2008 and again in 2014. This is an update to the agreement that occurs approximately every five years.

Analysis:

This agreement brought to you tonight is to update that agreement to reflect the current permit issued by the Texas Commission on Environmental Quality.

Both the City of Coppell and the Northwest Dallas County Flood Control District are obligated to adopt a SWMP under the TCEQ requirements. The TCEQ regulations and our SWMP require both the City and the NDCFCD to provide certain informational and participatory programs for residents of the City or the District. The plan requires the City or District enforce ordinances aimed at detecting illicit discharges to the storm water collection system. The plan also addresses storm

water runoff from development both during and after construction. Lastly, the plan addresses pollution prevention from ongoing municipal operations.

Under this agreement we will produce one joint Storm Water Management Program, and the City of Coppell will be responsible for the following minimum control measures:

- 1. Public Education and Outreach and Involvement
- 2. Illicit Discharge Detection and Elimination
- 3. Construction Site Storm Water Runoff Controls
- 4. Post-Construction Storm Water Management for New Development/Redevelopment
- 5. Pollution Prevention and Good Housekeeping for Municipal Operations

Under this agreement each entity will be responsible for filing its own forms, applications, reports, and any associated papers with the TCEQ to ensure compliance with any and all regulations related to the joint plan. We will also each be responsible for the fifth minimum control measure which deals with Pollution Prevention/Good Housekeeping for Municipal Operations.

Legal Review:

This agreement was reviewed by Robert Hager.

Fiscal Impact:

There is no fiscal impact of this agenda item.

Recommendation:

The Public Works Department recommends approval of this Interlocal Agreement.
