

Thursday, February 5, 3:30pm – 4 cars in line

Tuesday, February 9, 3:31pm – 2 cars in line

Wednesday, February 11, 3:36pm – 16 cars in line

Friday, February 13, 3:36pm – 15 cars in line

Monday, February 17, 3:38pm – 8 cars in line

This photo demonstrates how quickly the line clears. At 3:35pm the line was the typical MWF length of 12-16 cars (unfortunately I didn't take a photo on this day). Within 3 minutes of dismissal, several cars loaded and left, resulting in 8-car line. This is the daily experience.

Wednesday, April 1, 3:33pm – 12 cars in line

Wednesday, April 1, 3:35pm – 17 cars in line
