Storm Debris Response Plan

- Beyond the scope of the contract
- \$15,000 allocated every year

Options

1. Cut and Bundle
2. Curbside service

City of Coppell, TX Municipal Government

June 11 · 🌐

With many different trees downed or damaged in the area, the Community Development Department is working with Republic Services to assess damage and coordinate a cleanup effort to help residents get rid of branches or debris resulting from the storm. The City's goal is to provide residents time to clean up debris and offer convenient options for disposal. Storm debris will be collected starting next Monday, June 17, and residents are offered two options for debris disposal:

- Brush, tree branches and tree trimmings will be picked up Wednesday, June 12, on a regular schedule. If residents choose this option, they will need to bundle brush and tree trimmings in bundles of less than four-feet long and tie the bundles with cotton or jute string. Bundles shall weigh less than 40 pounds. All debris put out to be picked up as part of the regular trash service must be bundled or tied.
- For large debris, place debris in the front right of way (between sidewalk and the curb) by 7 a.m. Monday, June 17. Limbs do not need to be tied and bundled. Any limb 12 inches or greater in diameter or weighing more than 50 pounds must be placed in the front right of way.

If you have any questions about storm debris disposal, call Environmental Health at 972-462-5177 or 972-462-5164.
