

MEMORANDUM

To: Mayor and City Council

From: Kent Collins, P.E., Director of Public Works

Date: January 12, 2021

Reference: Discussion Regarding Enterprise Asset Management System

2040: Pillar 0: Sustainable City Government
Pillar 7: Apply “Smart City” Approach to Resource Management

The city implemented a work order system for Public Works infrastructure with the implementation of the Tyler Permit Land Management System and Public Maintenance Management systems in 2016. The work order system that was implemented is no longer supported by Tyler, and their replacement enterprise asset management system does not meet the city’s needs. Staff will present history, need for an asset management system, options that have been evaluated, and an update on the procurement process for a new system. Staff will request feedback on the need for an enterprise asset management system as part of the “Smart City” approach to resource management, as well as direction to proceed with the procurement and implementation of the selected system.

Legal Review:

N/A.

Fiscal Impact:

This is a work session item, so there is no fiscal impact with this item.

Recommendation:

This item is presented for discussion only.
