

MEMORANDUM

To: Mayor and City Council

From: Kent Collins, P.E., Director of Public Works

Date: September 11, 2018

Reference: Design for Reconstruction of Oak Grove Lane

2030: Sustainable City Government, Goal 3
Excellent and Well-maintained City Infrastructure and Facilities

General Information:

- Oak Grove Lane was originally constructed in the 1960's.
- Engineering Services contract for design is \$98,784.00
- Estimated construction cost is \$1,300,000.00

Introduction:

This agenda item is being presented for approval to enter into a design contract with Pacheco Koch Consulting Engineers, Inc. in the amount of \$98,784.00 for paving reconstruction of Oak Grove Lane from the intersection of South Coppel west approximately 1,000 LF to connect with the newer roadway extension.

Analysis:

To provide excellent and well-maintained city infrastructure, the citizens of Coppel authorized the use of ¼ cent sales tax revenue to be allocated for the reconstruction of our streets. Through an analysis of all streets within the City of Coppel, Oak Grove Lane was identified as needing reconstruction. In addition, the original section of Oak Grove Lane is undergoing redevelopment, so reconstructing the street now would be timely. The engineering design is budgeted in the 2017-2018 fiscal year.

The item before you this evening will involve engineering design for roadway reconstruction. The project improvements will include completing sewer, water and drainage improvements, as well as full pavement replacement and adding new sidewalks.

Legal Review:

The City Attorney has reviewed the agreement.

Fiscal Impact:

The fiscal impact of this agenda item is \$98,784.00, as budgeted in IMF.

Recommendation:

The Engineering Department recommends approval of this contract with Pacheco Koch Consulting Engineers, Inc.
