\$59,535

(This price quote follows BuyBoard Contract # 515-16 which is valid from Dec. 1, 2016 to Nov. 30, 2019.)

Standards for The Falcon Asphalt Recycler & Hot Box:

-Ability to recycle asphalt chunks and millings*. Visit Falcon's website at <http://falconrme.com/asphalt-hot-box-recycling-video-demonstration/> for a recycling video.

-A patented heat management system with a burner box combustion chamber constructed of a one-piece, seamless, vacuum formed ceramic fiber that is 1" thick with an insulation rating for temperatures in excess of 2,000 degrees Fahrenheit (required for recycling asphalt millings). Cross-section of seamless combustion chamber is provided.

-An independently certified fuel efficiency rating that exceeds 90% when tested at 105,000 BTU. Independent, 3rd party test results, on a qualified diesel burner testing facility's letterhead, are provided.

-VIP Technology™ - Voltage indicator and protector controller automatically prevents burner from operating below burner manufacturer's required voltage. This technology protects the burner from being damaged by low battery voltage.

*For optimal millings recycling performance, a dual burner unit is recommended.
